PROFESSIONAL SUMMARY

Fourth-year Computer Engineering student building full-stack, AI-integrated web applications. Backend developer of JobInterviewPro, a live interview-practice platform that won the 2025 System-Making Contest. Experienced with JavaScript, HTML, CSS, Firebase, MySQL, Groq API, and ESP32 IoT systems. Seeking an internship in software development or AI application development.

EDUCATION

BS in Computer Engineering, University of Rizal System - Antipolo Campus
Expected 2027 | Top Performing Student, College of Engineering
Relevant coursework: Programming, Data Structures, Embedded Systems, Database Management, Software Engineering

Senior High School (STEM), Sumulong College of Arts and Sciences
2021 - 2023 | Valedictorian, With Highest Honors

PROJECTS

JobInterviewPro: AI Interview Practice Web App (Backend Developer)
Live: jobinterviewpro.thsite.top | Winner, 2025 System-Making Contest
- Developed backend services with Firebase and MySQL for user data storage and session management.
- Integrated the Groq API to provide AI-powered interview coaching and feedback.
- Built and deployed the web application to a public domain for live use.

Tech: JavaScript, HTML, CSS, Groq API, Firebase, MySQL

DevKit: Document and Code Toolkit
Live: devkit-five-livid.vercel.app
- Built a web toolkit for students and developers that formats JSON, edits Markdown, generates READMEs, and explains errors.

Tech: JavaScript, HTML, CSS, Vercel

Aether: Interactive Web Experience
Live: aether-nine-dun.vercel.app
- Built a responsive, interactive interface where visitor input shapes a live visual field.

Tech: JavaScript, HTML, CSS, Vercel

Eco-Smart Station (RainErgy): Thesis (Team of Five, Co-author)
- Co-developed an ESP32-based prototype for rainwater harvesting, filtration, and hybrid solar and microturbine power.
- Submitted for patent or utility model registration.

Tech: ESP32, Arduino, Sensors, IoT Systems, Renewable Energy Systems

TECHNICAL SKILLS

Languages: Python, PHP, JavaScript, HTML, CSS
Databases and Backend: MySQL, NoSQL, Firebase
AI Integration: Groq API, Llama models, AI prompt engineering
Hardware and Embedded: Arduino, ESP32, sensors, IoT systems
Tools: GitHub, VS Code, GitHub Pages, Vercel, version control

HONORS AND AWARDS

- Winner, 2025 System-Making Contest (JobInterviewPro)
- Top Performing Student, College of Engineering, University of Rizal System
- SM Foundation Scholar, 2023 to 2027
- Senior High School Valedictorian, With Highest Honors, 2023
- Junior High School Valedictorian, With Honors, 2021
- Third Place, Provincial Statistics Quiz Bee, 2023

SEMINARS AND ACTIVITIES

- BRITE Program Research Seminar Participant, 2025
- Work Attitude Seminar, Completed
